

J Meeting Evaluation & SWOT Analysis

A meeting that ends without an honest evaluation is a meeting that teaches nothing. This module is the disciplined debrief that turns every project, presentation, and event at [Create The Edge](#) into sharper judgment for the next one.

J.0 Why the Debrief Decides	J.1 What a SWOT Analysis Is	J.2 Strengths
J.3 Weaknesses	J.4 Opportunities	J.5 Threats
J.6 Running the Evaluation	J.7 Golf Tournament SWOT	J.8 Turning SWOT into Action
J.9 Following Up	J.10 The Evaluation Checklist	✓ 15-Question Assessment

WATCH AND LISTEN

Section Briefings

Watch the video, listen to the podcast, then read the module. The same evaluation discipline in three formats.

VIDEO · MEETING EVALUATION & SWOT ANALYSIS

How Create The Edge turns every meeting and event into sharper judgment for the next one.

AUDIO · TURNING PROJECT EXPERIENCE INTO REPEATABLE LESSONS

The evaluation discipline that separates teams that improve from teams that repeat their mistakes, narrated.

MODULE J · STRATEGY INFOGRAPHIC

Section J Business Evaluation Infographic

 Section J Mind Map

MODULE J • FOUNDATIONS

J.0 • WHY THIS SECTION EXISTS

Why the Debrief Decides the Next Win

The work does not end when the meeting ends or the event closes. It ends when the team has named what worked, what did not, and what to change. A firm that skips the debrief repeats its mistakes at full price.

Every presentation, every proposal review, every event **Create The Edge** runs produces two outputs: the result, and the lesson. Most firms keep the result and lose the lesson. The deliberate evaluation is what captures the second one. It is a short, honest conversation, structured so that praise and criticism both land on something specific, and it converts the experience of one meeting into judgment the whole team carries into the next.

” EXPERT INSIGHT

"The teams that improve are the ones that sit down afterward and say out loud what went well and what did not. The ones that just move on to the next thing make the same mistake three years running and never notice."

· Marketing Director

1

PRODUCES

A Named Lesson

The vague sense that something went wrong becomes a specific, stated cause that the team can actually act on next time.

2

PRODUCES

A Repeatable Win

What worked is identified and made deliberate, so a one-time success becomes a standard the team can reproduce.

3

PRODUCES

Shared Judgment

The lesson lives in the team, not in one person's head, so the next person facing the same situation already knows better.

4

PRODUCES

An Action

Every evaluation ends in a change to make or a thing to keep, assigned to someone, not a discussion that evaporates.

 RULE OF THE HOUSE

No meeting or event is closed until it is evaluated. The debrief is part of the work, not an optional extra after it. The evaluation that gets skipped because everyone was busy is the one whose lesson gets paid for again at the next event.

What a SWOT Analysis Is

SWOT stands for Strengths, Weaknesses, Opportunities, and Threats. It is a simple grid that forces a balanced look: two quadrants on what you control now, two on what the future holds.

STRENGTHS <i>Internal · Present</i> What are we doing well that we should keep and build on? What the team or firm is doing well right now, within its power to continue.	WEAKNESSES <i>Internal · Present</i> What are we doing poorly that is within our power to fix? Internal gaps, bottlenecks, and breakdowns the team owns and can address.
OPPORTUNITIES <i>External · Future</i> What outside change could we turn to our advantage? Openings in the market, client, or situation that the team could convert into a gain.	THREATS <i>External · Future</i> What outside risk could hurt us if we do not prepare? External risks outside the team's direct control that could hurt the next effort.

✓ **BEST PRACTICE: REMEMBER THE TWO AXES**

Internal versus external, and present versus future. Strengths and weaknesses are about you, right now, and you can change them directly. Opportunities and threats are about the world around you, and you respond to them rather than control them. Keeping the axes straight stops the grid from collapsing into one vague list.

≡ **FROM THE FILES**

SWOT is not only a planning tool for the future; it is equally an evaluation tool for the past. After an event, the same four quadrants ask what went well, what went badly, what the result opens up next, and what could undermine the next one. **Create The Edge** uses it both ways.

J.2 • STRENGTHS

Strengths: What Is Working

Strengths are the things the team did well and should keep doing. Naming them matters as much as

naming problems, because a win nobody identifies is a win nobody repeats on purpose.

Strengths are internal and present: the capabilities, habits, and decisions that are working in the team's favor right now. It is tempting to rush past them to get to the problems, but that is a mistake. A strength that is named becomes a standard the team repeats deliberately. A strength left unnamed was luck, and luck does not show up reliably. The discipline is to state what worked specifically enough that someone could do it again.

FIGURE J.2.1 • FINDING REAL STRENGTHS

ASK	WHY IT MATTERS
What went better than expected?	Surfaces the wins that would otherwise be taken for granted
What did we do that we should repeat?	Turns a one-time success into a deliberate standard
What advantage do we have that competitors do not?	Identifies what to lean on harder in the next effort
Who or what made the difference?	Credits the specific cause so it can be resourced again

” EXPERT INSIGHT

"When something goes really well, stop and figure out exactly why before you move on. That is the thing you want to bottle and do every single time. Most people only analyze the failures and let the wins slip past unexamined."

· Marketing Director

✓ BEST PRACTICE

Be specific about strengths, not generic. "The early sign-up push worked" is useful because it names a tactic to repeat. "Everyone did great" is not, because no one can act on it. A strength is only worth listing if it is concrete enough to reproduce on purpose.

J.3 · WEAKNESSES

Weaknesses: What Is Holding Back

Weaknesses are the internal problems the team can actually fix. The honest naming of them, without blame, is what separates a useful evaluation from a comfortable one.

Weaknesses are internal and present: the gaps, bottlenecks, and breakdowns that are within the team's power to address. The hard part is honesty. An evaluation that protects feelings by softening the weaknesses is worthless, because the unspoken problem repeats. The skill is to name the weakness as a problem with a process, not a person, so the conversation stays about fixing the system rather than assigning fault.

FIGURE J.3.1 · NAMING WEAKNESSES USEFULLY

WEAK FRAMING	USEFUL FRAMING
"Check-in was a mess"	"One line formed instead of two, so people waited and got frustrated"
"Volunteers were useless"	"Volunteers arrived without a specific assigned task, so they waited to be told what to do"
"We ran short"	"We capped at 144 but registration crept to 156, and we ran short on golf carts"
"Communication was bad"	"The task list was emailed but never confirmed, so no one owned the morning roles"

■ RULE OF THE HOUSE

Name the weakness as a problem with a process, not a verdict on a person. "The hand-off had no owner" can be fixed; "she dropped the ball" starts an argument and fixes nothing. The evaluation exists to improve the system, and that only works when people can be honest without being blamed.

 COMMON FAILURE

The polite evaluation that lists only strengths because no one wants to criticize. It feels good and changes nothing. If the debrief produces no weaknesses, it was not honest, and the same problems will surface again at the next event, having cost real money the second time.

MODULE J · FOUR QUADRANTS

J.4 · OPPORTUNITIES

Opportunities: What Could Be Gained

Opportunities are external openings the team could turn to its advantage. The skill is seeing them, because an opportunity ignored looks exactly like nothing happening at all.

Opportunities are external and forward looking: changes in the market, the client, or the situation that the team could convert into a gain. They are easy to miss because they arrive disguised as ordinary events. A client saying the fee is a little high is, framed correctly, an opportunity to adjust and win the work rather than a rejection. The discipline is to ask, of every development, what advantage it could be turned into.

FIGURE J.4.1 · WHERE OPPORTUNITIES HIDE

LOOKS LIKE	COULD BE THE OPPORTUNITY TO
A client says the fee is a little high	Adjust the scope or fee and help them say yes, winning the project
An event drew a strong turnout	Add sponsorships, videos, or content that builds on the momentum
A presentation went well with one architect	Build the relationship into referrals and repeat work
A new channel is gaining attention	Couple it with existing efforts so each one amplifies the others

” EXPERT INSIGHT

"When a client tells you the proposal is a little too high, that is not a no. That is an opening. It gives you the chance to say, let us adjust this so we can help you win the project. Framed right, the objection is the opportunity."

· Marketing Director

✓ BEST PRACTICE

Couple opportunities together rather than chasing them one at a time. An interview becomes a video, the video goes on the channel, the channel feeds the social posts, and each piece amplifies the others. A single opportunity used in isolation is a fraction of what the same effort produces when the pieces are linked.

MODULE J · FOUR QUADRANTS

J.5 · THREATS

Threats: What Could Go Wrong

Threats are external risks that could undermine the next effort. Naming them in advance is what turns a threat from a surprise that derails the day into a contingency the team already planned for.

Threats are external and forward looking: the risks outside the team's direct control that could hurt the next project or event. Many threats are predictable from past experience, and naming them is the first step to neutralizing them. Most threats are not disasters waiting to happen; they are simply things that have not been confirmed yet.

FIGURE J.5.1 · COMMON THREATS AND THEIR DEFENSES

THREAT	THE DEFENSE NAMING IT ENABLES
People who never replied but show up on the day	A clear registration cutoff and a plan for walk-ins
Registration exceeding the planned cap	A firm cap with a known margin, decided before it is hit

Last-minute logistics falling apart

An assigned owner for rides, signage, and coordination

A key dependency arriving late or not at all

A confirmation step rather than an assumption it is handled

✓ BEST PRACTICE

Treat last year's chaos as this year's threat list. The problems that blindsided the team last time are the most predictable threats this time, because they already happened once. An evaluation that captured them becomes the checklist that prevents them, which is the entire return on doing the debrief.

≡ FROM THE FILES

A threat is not always a disaster; sometimes it is simply the thing that has not been confirmed yet. The registrants who have not replied, the contract not yet signed, the volunteer who has not been given a task: each is a threat only until someone closes it. Most threats are neutralized by confirmation, not heroics.

Running the Meeting Evaluation

The evaluation is a meeting with a shape. Someone leads it, the four quadrants give it structure, and it ends in writing with actions assigned. Without that shape it becomes a venting session that changes nothing.

1

STEP ONE

Lead It

One person runs the debrief and walks the team through all four quadrants in order, keeping it from drifting into only complaints.

2

STEP TWO

Hear Everyone

The person who saw the problem is often not the one who owns it. Every role in the room sees a different part of the picture.

3

STEP THREE

Write It Down

Capture the four quadrants in writing. An evaluation no one recorded is forgotten before the next event needs it.

4

STEP FOUR

Assign Actions

Each change to make gets an owner and a name attached. Insight with no owner is a conversation, not an improvement.

” EXPERT INSIGHT

"What worked last time was giving each volunteer a specific task and having them sign their name to it. Active, named, accountable. The year we just asked for volunteers in general, everyone showed up and stood around asking what to do."

· Marketing Director

■ RULE OF THE HOUSE

An evaluation ends with assigned actions or it did not happen. The test of a debrief is not how good the discussion felt but how many specific changes left the room with a name attached. No owner, no action; no action, no improvement.

J.7 · WORKED EXAMPLE

The Golf Tournament SWOT: A Real Example

*This is a SWOT **Create The Edge** actually ran. In planning the annual golf tournament, the team built a full analysis of the prior year to shape the next. It shows the framework working on a real event, not a hypothetical.*

Each year **Create The Edge** hosts a golf tournament, and the team plans the next one by analyzing the last. The tournament runs on a known date with an 8am check-in and a 9:30 shotgun start, capped near 144 players. The analysis below is drawn from that real session.

FIGURE J.7.1 · THE GOLF TOURNAMENT SWOT

QUADRANT	WHAT THE TEAM IDENTIFIED
Strengths	The early sign-up push worked well. Raffle prizes were chosen during play and matched to winners on the spot, replacing the old hours-long draw. Two course plans were ready, returning teams came back, and the giveaways were popular.
Weaknesses	Golf cart capacity ran short when registration crept from the 144 cap to 156. Check-in bottlenecked into one long line instead of a split by last name. Volunteers arrived without specific assigned tasks and waited to be told what to do.
Opportunities	Raise the price per player on the new contract. Add three or four videos to promote the event. Give each volunteer a specific named task so they participate actively. Build sponsorships and expand the raffle.
Threats	People who never replied but show up on the day. Registration exceeding the cart capacity again. Last-minute ride and logistics confusion pulling the lead away from running the event.

Notice how each quadrant points to an action. The check-in bottleneck (weakness) becomes a plan to split the line and assign a named greeter (action). The no-shows (threat) become a registration cutoff (defense). This is the whole purpose of the grid: every box should generate something the team will do differently next time.

✓ BEST PRACTICE

Run the SWOT on last year's event while planning this year's. The team that analyzes the previous tournament before the next one walks in already knowing what to repeat and what to fix. The analysis is most valuable when it sits at the front of planning, not filed away after the fact.

MODULE J · RUNNING THE EVALUATION

J.8 · FROM ANALYSIS TO ACTION

Turning SWOT into Action

A SWOT grid is not the deliverable. The actions it produces are. Each quadrant pairs with a move: keep the strengths, fix the weaknesses, pursue the opportunities, defend against the threats.

FIGURE J.8.1 · EACH QUADRANT BECOMES A MOVE

QUADRANT	THE ACTION IT DEMANDS
Strengths	Make it deliberate. Write the win into the plan so it is repeated on purpose, not by luck.
Weaknesses	Assign a fix. Give the process gap an owner and a specific change before the next effort.
Opportunities	Pursue with an owner. An opportunity nobody is assigned to chase is one nobody chases.
Threats	Plan a defense. Decide the cutoff, the margin, or the contingency now, while it is calm.

RULE OF THE HOUSE

Every quadrant must produce at least one action with a name on it. A strength with no plan to repeat it, or a threat with no defense assigned, is an observation, not a result. The grid is judged by the actions that leave it, not by how complete the boxes look.

COMMON FAILURE

Treating the SWOT as the finished product. The team fills in four neat boxes, feels productive, and files it. Next event, the same weaknesses recur because the boxes were never converted into assigned changes. The analysis without the action is theater.

MODULE J · CLOSING THE LOOP

J.9 · FOLLOW-UP

Following Up After the Meeting

The evaluation names the actions. The follow-up makes sure they happen. Without it, the best debrief in the world produces a list that everyone agreed with and no one executed.

FIGURE J.9.1 · THE FOLLOW-UP DISCIPLINE

STEP	WHAT IT ENSURES
Confirm each owner accepts the action	No action is orphaned because the owner never knew it was theirs
Set a date for each action	An action without a deadline competes with everything urgent and loses
Check progress before the next event	Problems surface while there is still time to fix them, not on the day
Carry forward what is unfinished	An incomplete action is tracked, not silently dropped

” EXPERT INSIGHT

"The follow-up is where most of it is won or lost. Anyone can have a good meeting. The teams that actually improve are the ones that go back to the list a week later and make sure the things people agreed to are actually getting done."

· Marketing Director

✓ BEST PRACTICE

Put the assigned actions somewhere they will be seen again before the next event, not buried in meeting notes. The list that resurfaces at the right time gets done; the one filed and forgotten gets rediscovered only when the same problem repeats. Tie the follow-up to the next planning session so the loop closes itself.

MODULE J · CLOSING THE LOOP

J.10 · THE CHECKLIST

The Evaluation Checklist

The whole section reduces to a checklist run after every meeting, presentation, and event. It is the same discipline as the fee defense checklist in Section H, the compliance checklist in Section I, and the file discipline checklist in Section K, applied to learning from experience.

The evaluation is a habit, and habits hold when reduced to a checklist run every time. Run it after every significant meeting, presentation, or event, and the team compounds its judgment instead of repeating its mistakes.

Run the Four Quadrants

- ☐ Strengths named specifically enough to repeat on purpose
- ☐ Weaknesses framed as process problems, not blame
- ☐ Opportunities identified, including objections reframed as openings

Threats listed from last time's surprises and current unknowns

- Every quadrant produces at least one action

Close the Loop

- Each action has a named owner and a date
- The evaluation is captured in writing, not just discussed
- Actions are placed where they resurface before the next event
- Progress is checked, and unfinished items carried forward
- The analysis feeds the next planning session at the front, not the file

RULE OF THE HOUSE

If the evaluation produced no weaknesses and no assigned actions, it was not honest and it did not happen. A debrief that only confirms how well everything went has skipped its entire purpose. Run the full grid, name the hard things, and assign the changes.

” EXPERT INSIGHT

"The point of looking back is to be better next time. Strengths, weaknesses, opportunities, threats: say them honestly, write them down, give each one a name and a next step. That is how a team that has done a thing once does it twice as well."

· Marketing Director

✓ COMPREHENSIVE TEST

Fifteen Questions on Meeting Evaluation and SWOT

Fifteen questions across all eleven sub-modules. Each has one correct answer. Work through them in one sitting, then check against the answer legend.

1

SWOT stands for:

- ☐ A Strengths, Weaknesses, Outcomes, Tactics
- ☐ B Strengths, Weaknesses, Opportunities, Threats
- ☐ C Systems, Workflows, Operations, Targets
- ☐ D Scope, Work, Order, Time

2

Strengths and weaknesses are best described as:

- ☐ A External and future-looking
- ☐ B Internal and present, within the team's control
- ☐ C Things only management can assess
- ☐ D Irrelevant to an evaluation

3

Opportunities and threats differ from strengths and weaknesses because they are:

- ☐ A Less important
- ☐ B External and forward-looking
- ☐ C Always negative
- ☐ D Only about money

4

Why name strengths and not just problems in an evaluation?

- ☐ A To make people feel good
- ☐ B So a win can be repeated deliberately rather than left to luck
- ☐ C It is not necessary to name strengths
- ☐ D To fill time

5

The most useful way to frame a weakness is:

- ☐ A As a verdict on the person responsible
- ☐ B As a problem with a process that can be fixed
- ☐ C Vaguely, to avoid hurting feelings
- ☐ D By leaving it out entirely

6

A client saying "the proposal is a little too high" is best treated as:

- ☐ A A flat rejection
- ☐ B An opportunity to adjust and help them win the project
- ☐ C A reason to walk away
- ☐ D An insult to ignore

7

In SWOT, a threat is best understood as:

- ☐ A Something to panic about
- ☐ B An external risk to prepare a defense against
- ☐ C An internal weakness
- ☐ D A guaranteed disaster

8

Many threats are neutralized not by heroics but by:

- ☐ A Ignoring them
- ☐ B Confirmation, closing the open item before it becomes a problem
- ☐ C Hoping for the best
- ☐ D Adding more people on the day

9

A meeting evaluation should end with:

- ☐ A A general good feeling
- ☐ B Specific actions assigned to specific people
- ☐ C A promise to discuss it again sometime
- ☐ D Nothing in particular

10

In the golf tournament example, volunteers struggled because they:

- ☐ A Were too few in number
- ☐ B Arrived without a specific assigned task and waited to be told what to do
- ☐ C Refused to help
- ☐ D Were never asked

11

The golf tournament check-in bottleneck was caused by:

- ☐ A Too few players
- ☐ B One long line forming instead of a split by last name
- ☐ C Bad weather
- ☐ D A late start

12

The purpose of converting a SWOT grid into actions is that:

- ☐ A The grid itself changes nothing until it produces decisions
- ☐ B Grids look professional
- ☐ C It fills the meeting time
- ☐ D Clients expect it

13

Follow-up after an evaluation means:

- ☐ A Filing the notes and moving on
- ☐ B Confirming owners, setting dates, and checking progress before the next event
- ☐ C Waiting for problems to reappear
- ☐ D Holding another meeting with no agenda

14

The best time to run a SWOT on an event is:

- ☐ A Never; it is busywork
- ☐ B On last year's event while planning this year's, at the front of planning
- ☐ C Only if something went wrong
- ☐ D Years later, for the record

15

If an evaluation produces no weaknesses and no assigned actions, it:

- ☐ A Was a great meeting
- ☐ B Was not honest and did not serve its purpose
- ☐ C Means everything is perfect
- ☐ D Should be celebrated

📁 ANSWER LEGEND · PART 1 OF 2

Answers · Questions 1 through 8

Do not review until the test is complete. Return to any sub-module that surprised you.

QUESTION 1

Correct: B · Strengths, Weaknesses, Opportunities, Threats

SWOT is the four-quadrant framework: two internal and present, two external and forward-looking. The grid forces a balanced view rather than a one-sided list. See J.1.

QUESTION 2

Correct: B · Internal and present, within the team's control

Strengths and weaknesses describe what the team is doing well and badly right now, and both are within its power to change directly. See J.1, J.2, and J.3.

QUESTION 3

Correct: B · External and forward-looking

Opportunities and threats sit outside the team and ahead in time. They are responded to and prepared for rather than controlled directly. See J.1.

QUESTION 4

Correct: B · So a win can be repeated deliberately rather than left to luck

A strength that is named specifically becomes a standard the team reproduces on purpose. A win nobody identifies is a win nobody repeats reliably. See J.2.

QUESTION 5

Correct: B · As a problem with a process that can be fixed

Framing a weakness as a process gap keeps the conversation on fixing the system. Framing it as a verdict on a person starts an argument and fixes nothing. See J.3.

QUESTION 6

Correct: B · An opportunity to adjust and help them win the project

An objection on price is an opening, not a no. Reframed, it lets the consultant adjust the scope or fee and help the client say yes. See J.4.

QUESTION 7

Correct: B · An external risk to prepare a defense against

A threat is an outside risk that could hurt the next effort. Naming it in advance turns it from a surprise into a contingency the team already planned for. See J.5.

QUESTION 8

Correct: B · Confirmation, closing the open item before it becomes a problem

Most threats are simply things not yet confirmed: the unsigned contract, the unreplied registrant, the untasked volunteer. Confirmation neutralizes them. See J.5.

MODULE J · ASSESSMENT

☑ ANSWER LEGEND · PART 2 OF 2

Answers · Questions 9 through 15

The remaining answers with reasoning and sub-module cross-references.

QUESTION 9

Correct: B · Specific actions assigned to specific people

An evaluation that produces only insight, with no owner for the change, produces no change. The debrief ends with assigned actions or it did not happen. See J.6.

QUESTION 10

Correct: B · Arrived without a specific assigned task and waited to be told what to do

In the real golf tournament evaluation, general volunteer calls produced people who showed up unsure of their role. The fix was a specific named task per volunteer. See J.6 and J.7.

QUESTION 11

Correct: B · One long line forming instead of a split by last name

The check-in was meant to split by last name across two tables, but one line formed. A named greeter and an enforced split is the fix. See J.7.

QUESTION 12

Correct: A · The grid itself changes nothing until it produces decisions

A SWOT filled in and filed has produced nothing. The value is in converting each quadrant into an assigned action: keep, fix, pursue, defend. See J.8.

QUESTION 13

Correct: B · Confirming owners, setting dates, and checking progress before the next event

Follow-up connects the evaluation to the next result. Owners confirm, deadlines are set, and progress is checked before the next event. See J.9.

QUESTION 14

Correct: B · On last year's event while planning this year's, at the front of planning

The analysis is most valuable at the front of planning, so the team walks in knowing what to repeat and what to fix. See J.7.

QUESTION 15

Correct: B · Was not honest and did not serve its purpose

A debrief that lists only strengths and assigns no actions has skipped its purpose. The same problems will recur at the next event, having cost real money the second time. See J.3 and J.10.

MODULE J · STUDY TOOLS

◆ FLASHCARDS · REFERENCE GRID

Twelve Cards · Front and Back

Twelve flashcards covering the working vocabulary of Section J. Read the front, recall the back, then check.

1 SWOT

Strengths, Weaknesses, Opportunities, Threats. A four-quadrant grid that forces a balanced view of any situation or past event.

(J.1)

2 The Two Axes

Internal vs external, and present vs future. Strengths/weaknesses are internal and present; opportunities/threats are external and future.

(J.1)

3 Strengths

What is working, named specifically enough to repeat on purpose. A win left unnamed is luck, and luck does not repeat reliably.

(J.2)

4 Weaknesses

Internal problems the team can fix. Frame as a process gap, not a verdict on a person, so the system gets fixed without blame.

(J.3)

5 Opportunities

External openings to turn to advantage. Often disguised as ordinary events; an objection on price can be an opening to win the work.

(J.4)

6 Threats

External risks to prepare a defense against. Named in advance, a threat becomes a contingency instead of a surprise.

(J.5)

7 Threats Are Unconfirmed Items

The unsigned contract, the unreplied registrant, the untasked volunteer. Most threats are closed by confirmation, not heroics.

(J.5)

8 Shape of the Evaluation

Someone leads it, all four quadrants are covered, it is captured in writing, and it ends with assigned actions. No owner = no action = no improvement.

(J.6)

9 The Golf Tournament SWOT

Real Create The Edge example: early sign-up worked; carts ran short; raise price and add videos; no-shows and logistics were threats. Each box produced an action.

(J.7)

10 Each Quadrant Becomes a Move

Keep the strengths, fix the weaknesses, pursue the opportunities, defend against the threats. Every box produces an action. A grid filled without actions produced nothing.

(J.8)

11 Follow-Up

Confirm owners, set dates, check progress before the next event, carry forward what is unfinished. Where improvement is won or lost.

(J.9)

12 The Honesty Test

If the evaluation produced no weaknesses and no assigned actions, it was not honest and did not happen. The debrief exists to improve the system, not to confirm how well things went.

(J.10)

MODULE J · STUDY TOOLS

✂ PRINTABLE CUT-OUT STUDY CARDS

Print, Cut, Carry

Twelve cards arranged for printing. Cut along the borders. Keep them on your desk.

SWOT

Strengths, Weaknesses, Opportunities, Threats.
A four-quadrant grid forcing a balanced view of
a situation or past event.

The Two Axes

Internal vs external, present vs future.
Strengths/weaknesses are internal and now;
opportunities/threats are external and ahead.

Strengths

What is working, named specifically enough to
repeat on purpose. A win left unnamed is luck.

Weaknesses

Internal problems the team can fix. Frame as a
process gap, not a verdict on a person.

Opportunities

External openings to turn to advantage. An
objection on price can be an opening to win
the work.

Threats

External risks to defend against. Named in
advance, a threat becomes a contingency, not a
surprise.

Threats Are Unconfirmed Items

The unsigned contract, the unreplied registrant, the untasked volunteer. Confirmation neutralizes most threats.

Shape of the Evaluation

Someone leads it, all four quadrants covered, captured in writing, ends with assigned actions.

The Golf Tournament SWOT

Real example: early sign-up worked; carts ran short; raise price, add videos; no-shows and logistics were threats.

Each Quadrant Becomes a Move

Keep strengths, fix weaknesses, pursue opportunities, defend against threats. Every box produces an action.

Follow-Up

Confirm owners, set dates, check progress before the next event. Where improvement is won or lost.

The Honesty Test

No weaknesses and no assigned actions = the evaluation was not honest and did not happen.
